

6th Grade Homework

Date: Tuesday, January 5th

6A: Kayden Sarah Wyatt Kylee

6B: Caleb

6C: Chloe Landon

SOCIAL STUDIES:

SS Vocab, Map and Edpuzzle - due Wed

SCIENCE:

Ch-16 Cells vocab definitions due Thu.
Edpuzzle - Cells - due Thu.

MATH: Finish Map Testing

• Missing assignments due tom.

• IXL 5.1-5 due Mon.

• Ch. 3 vocab due Thurs.

ELA: STAR Test and set new
AR Goals! Finish activities from
yesterday.

HW: Read 20 minutes & MAP Test
OTHER: tomorrow

Chapter 16 Cells – The Units of Life

Write the **definitions** for each word below. Use your glossary in your binder. If the word is not in the glossary, it will be written on this paper for you to copy from. Be sure to:

- *number each word
- *underline it
- *put a dash after it
- *write the complete definition
- *Skip a line and move on to the next vocab word.

1. Theory – an explanation of things or events based on scientific knowledge that is the result of many observations and experiments
2. Cells – the smallest unit of life in all living things
3. bacteria
4. cytoplasm
5. cell membrane
6. vacuole
7. nucleus
8. ribosome – organelles that produce proteins
9. mitochondria
10. cell wall
11. chloroplasts
12. organelles
13. tissue
14. organ
15. organs system
16. Photosynthesis -
17. organism – anything that possesses all the characteristics of life
18. Chromosomes- found inside the nucleus, they contain hereditary information called DNA that determines what traits an organism will have
19. Endoplasmic Reticulum - Helps to make and transport needed materials throughout the cell. Ribosomes are often found on the ER
20. Golgi Bodies -packages needed materials in the cell and stores them until they cell needs them or until they are ready to be sent out of the cell. They make lysosomes
21. Lysosomes - made in the Golgi Bodies, they help with digestion of food.
