Adding and Subtracting DECIMALS Answer Key

1. When adding and subtracting decimals, it is important to estimate your answer first!
2. Next, line up the decimal points.
3. Write zeros to make the columns even.
4. Write the decimal point in the sum or difference.
5. Add or subtract as you normally would.
6. Compare your answer with your estimate.

Adding and Subtracting Decimals:

1. Line-up the decimal points
2. Fill in zeros
3. Move the decimal point into the answer
4. Add or subtract!

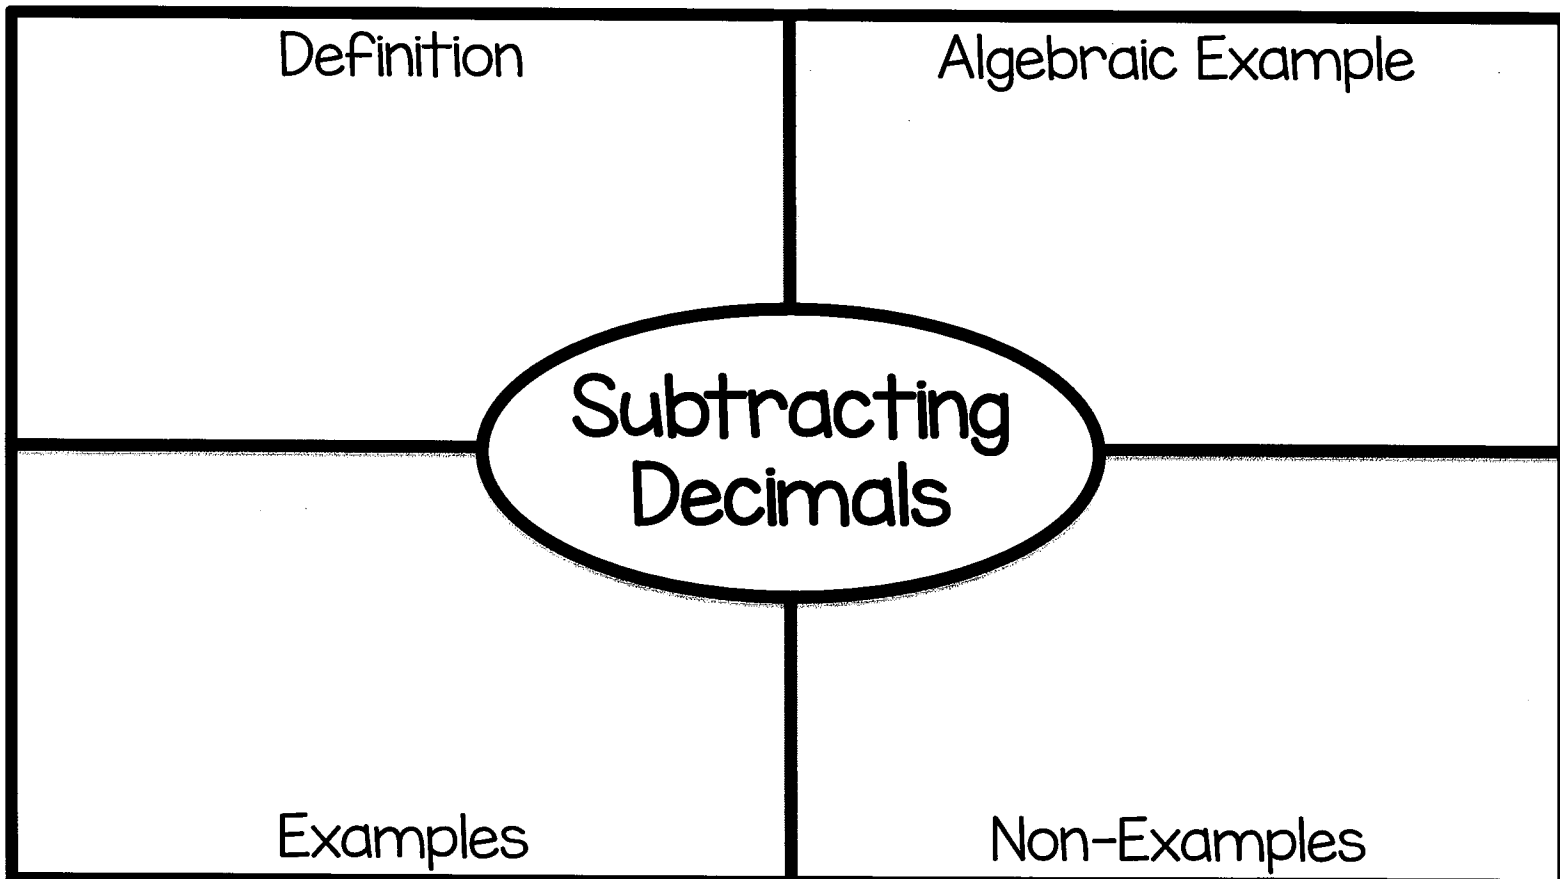

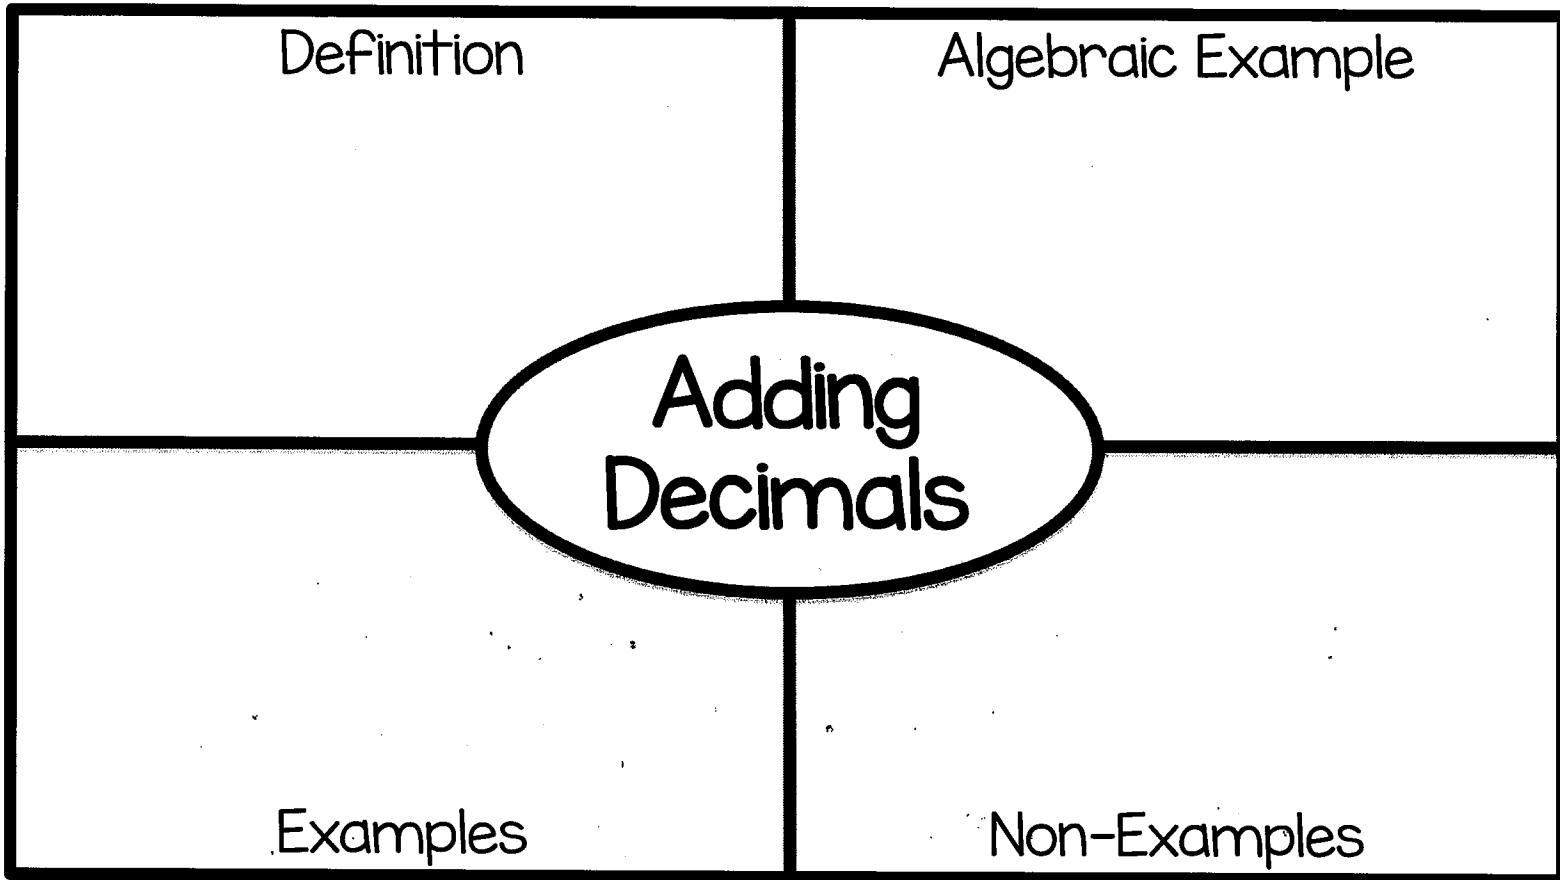

$$\begin{array}{r} 3.4 + 2.76 = \\ 6.16 \end{array}$$

$$\begin{array}{r} 12.45 - 2.607 = \\ 9.843 \end{array}$$

Practice: Adding and Subtracting Decimals

Find each sum or difference. Show all of your work.

#1 $4.5 + 0.33 =$

#2 $25.1 - 13.208 =$

#3 $6 + 3.245 =$

#4 $26 - 18.09 =$

#5 $6.07 + 2.2 - 0.25 =$

#6 $4.001 + 2.78 - 3.4 =$

#7 Mark is shopping for school supplies. He spent \$12.46 on notebooks and \$4.36 on pencils. If he pays with a \$20.00 bill, how much change will he receive.
